KF7004 – MComp Computing Research Project Reflection

16018262

Sept 22

Word count:

Contents

1 Possible Topics

- Lack of support - Can possibly use theory around support and outcomes?

- ethics - difficulties due to new methods etc.

- was this research too big

- Gantt chart or lack thereof makes the work easier and more adgile, Agile development, which is an iterative approach to software development, can provide more flexibility in the development process,

2 Background, Motivation, Relevance, Sources of Knowledge

The work carried out as part of this MCOMP has been challenging, largely due to factors benod my control
